

Table 30--Durum flour production 1/

Calendar year	Durum wheat ground for semolina and durum flour (1,000 bushels)	Semolina and durum flour extraction rate (percent)	Semolina and durum flour production (1,000 cwt) 2/	Durum millfeed production (1,000 tons)
1992	67,999	355.2	31,905	445
1993	70,575	362.1	32,488	493
1994	72,141	368.5	32,631	533
1995	67,627	364.0	30,964	481
1996	70,069	358.0	32,623	471
1997	64,663	365.6	29,476	466
1998	58,395	359.7	27,056	399
1999	56,314	359.8	26,086	385
2000	69,687	365.8	31,749	503
2001	73,435	371.7	32,930	557
2002	71,622	368.3	32,411	528
2003	64,294	360.9	29,691	444
2004	60,370	373.2	26,959	463
2005	67,807	367.8	30,729	498
2006	73,605	384.0	31,948	611
2007	75,115	381.6	32,804	613
2008	68,269	368.1	30,911	503
2009	70,617	372.8	31,568	540
2010	72,175	367.3	32,747	528

1/ The data series in this table end in calendar year 2010 because the Census Bureau no longer provides data on the U.S. wheat milling sector which had been the source of the durum flour data.

2/ Straight semolina only (semolina made entirely from durum). cwt = hundredweight.

Source: U.S. Department of Commerce, Bureau of the Census, Flour Milling Products (MQ20A).

Date run: 5/21/2012
