You said that altogether your household usually spends ($_ _ _ _) / about (_ _ _ _ to ___ _ _) on food in an average week. This next question asks you to estimate the LOWEST amount of money that you would need to spend on food to meet the food needs of your household.

What is the LOWEST POSSIBLE amount that you could spend for food, per week or per month, and still provide a healthy, acceptable diet for your household (including any purchases made with food stamps)?

   $ _ _ _ _

   <1> Per week
   <2> Per month

Blind <D> or <R>

Use S3A and S3B here, not S3. S3A is the amount, S3B indicates "per week" or "per month".
