Abstract

Just over 900 million people in the 70 low-income countries studied in this report are estimated to have consumed less than the recommended nutritional requirements in 2003. This marks a decline from more than 1 billion in 2002. Although food security is expected to improve in all regions over the coming decade, this improvement will vary. Food security is projected to improve most significantly in Asia, followed by Latin America and the Caribbean. Although some improvement is also expected in Sub-Saharan Africa, the deep poverty at the root of hunger problems in the lower income population will remain unchanged. Food aid has been and continues to be an important tool used by the international community to fight hunger in low-income countries, and the United States is the dominant food-donor country. However, the effectiveness of food aid could be improved by increased coordination between donor groups, more transparent eligibility criteria, and fewer fluctuations in year-to-year aid levels.

Preface

This report continues the series of food assessments begun in the late 1970s. Global Food Assessments were done from 1990 to 1992, hence the GFA series. In 1993, the title was changed to Food Aid Needs Assessment to more accurately reflect the contents of the report, which focuses on selected developing countries with past or continuing food deficits. In 1997, we widened our analysis beyond the assessment of aggregate food availability to include more aspects of food security. We therefore changed the title to Food Security Assessment.

Acknowledgments

Appreciation is extended to Neil Conklin, Director of the Market and Trade Economics Division, and John Dunmore for their support of the food security work and to Janet Perry and Cheryl Christensen for valuable comments on the articles. We would also like to thank the reviewers, especially Carol Goodloe, Erik Hansen, Gary Meyer, Debra Pfaff, and Dave Stallings for their comments. Special thanks are extended to Lou King, Wynnice Pointer-Napper, and Victor Phillips, Jr. for editorial and design assistance.
