Sub-Saharan Africa is the only region that has not made progress toward the World Food Summit goal of cutting hunger in half by 2015.
Food Security Assessment, 2005

Birgit Meade, Stacey Rosen, and Shahla Shapouri, coordinators

Abstract

In 2005, 777 million people were food insecure in 70 lower income countries. For the 70 countries, on average, there has been a slight (7 percent) decline in the number of hungry people from 688 million in 1992-94 to 639 million in 2002-04. The largest decrease occurred in North Africa. Both Asia and the Commonwealth of Independent States experienced a 30-percent drop in the number of hungry people. The number of hungry people in Latin America and the Caribbean has varied slightly over time, but there has been no discernible trend across the region as a whole. Despite strong growth in food production, Sub-Saharan Africa is the only region where the number of hungry people has risen—over 19 percent—during the last decade. In 2002-04, more than half of the region’s population—roughly 350 million—were hungry. Between the 2002-04 base period and 2015—the World Food Summit target date for reducing the number of the world's undernourished people by half—results indicate a 10-percent increase in the distribution gap (the amount of food needed to raise consumption levels to nutritional requirements) and a 16-percent jump in the number of hungry people.

Keywords: food security, food aid, production, imports, Sub-Saharan Africa, North Africa, Asia, Latin America and the Caribbean, Commonwealth of Independent States

Preface

This report continues the series of food assessments begun in the late 1970s. Global Food Assessments were done from 1990 to 1992, hence the GFA series. In 1993, the title was changed to Food Aid Needs Assessment to more accurately reflect the contents of the report, which focuses on selected developing countries with past or continuing food deficits. In 1997, we widened our analysis beyond the assessment of aggregate food availability to include more aspects of food security. We therefore changed the title to Food Security Assessment.
Acknowledgments

Appreciation is extended to Neil Conklin and John Dunmore of ERS for their support of the food security work, and to Cheryl Christensen, Joy Harwood and Janet Perry of ERS for valuable comments on the articles. We would also like to thank the reviewers, especially Carol Goodloe, of USDA’s Office of the Chief Economist, Rita Carleton and Ralph Dutrow of USDA’s Foreign Agricultural Service, and David Stallings of USDA’s World Agricultural Outlook Board, for their comments. Special thanks are extended to Lou King, Wynnice Pointer-Napper, and Victor Phillips, Jr. for editorial and design assistance.
