**Tobacco Program**

**Cost Regulations**

The Secretary is to design regulations and policies by January 1982 to ensure that the tobacco program results in no net costs to taxpayers, except for incidental administrative costs. Any changes in law needed to achieve this goal shall be recommended to Congress by January 1982.

**Farm Income**

**Protection Study**

A 13-member task force will be appointed from designated groups by the Secretary to study the feasibility of farm income protection insurance. The task force shall examine a number of areas including: the characteristics of such a program, feasibility as a substitute for current programs, roles for government and private industry to play, alternative administration, farmer acceptance, and program costs. The task force will prepare a report on the study for Congressional Committees within 18 months of the enactment of this Act (December 22, 1981) and then dissolve 45 days thereafter.

**Grain Inspection**

State agencies which inspect grain were granted authority, in addition to that granted under the United States Grain Standards Act, to expand their inspections into more export port locations currently being served by the Federal Grain Inspection Service. However, these agencies must have performed official inspections at any export port locations prior to July 1, 1976; been designated to perform official inspections at locations other than export ports when the 1981 Act was enacted; and be located in a State from which annual exports of grain do not exceed 5 percent of the total grain exported from the United States. This section will become effective 180 days after the enactment of this Act. Prior to this action only those State agencies which were performing official inspections at export port locations as of July 1, 1976, were eligible.

**Agriculture**

**Advisory Committees**

Regulations dealing with committee membership, reports, and expenditures have been strengthened by modifications included in Title XVIII of the 1977 Act—Department of Agriculture Advisory Committees. No person outside the Department may serve simultaneously on more than one committee without special permission. In addition, no committee may have more than one employee from any individual nonfederal organization at any one time, unless authorized by the Secretary of Agriculture. No individual outside the Department may serve more than 6 consecutive years without special permission. The Secretary must submit annual reports to Congress on the committees' operation. The Secretary will be able to terminate any committee if any of the following conditions exist: The expenditure limit above annual operating costs is exceeded, without prior approval, by more than 10 percent or $500, whichever is greater; a committee fails to file all reports or meet for 2 consecutive years; a committee has become responsible for Federal employee functions; or a committee no longer serves an essential public function.

**Distribution of Surplus Commodities**

Whenever the Government acquires stocks of commodities through price support programs and is not likely to sell or distribute them, they will be made available without charge to nutrition programs established by the Older Americans Act of 1965, to child nutrition programs providing food service, and to food banks participating in specified special nutrition projects.
The final report on special nutrition projects will be due on January 1, 1984, rather than October 1, 1982, with a progress report due on July 1, 1983.

Cost of Production Study

The Secretary is directed to specifically include interest costs as a variable cost in the annual cost of production study.

PACA Fees

Fees charged under the Perishable Agricultural Commodities Act (PACA) of 1930, which licenses and helps regulate the retail fruit and vegetable sector and frozen food brokers, have been increased to allow for the continuation of the program. The license fee ceiling will be increased from $150 to $300; the branch fee from $50 to $150, although up to 9 branches will continue to be eligible for exemptions; and the total maximum aggregate fee (the original license fee plus branches) from $1,000 to $3,000. In addition, the damage claim floor that must be reached before triggering mandatory oral hearings will be increased from $3,000 to $15,000. The minimum level of purchases of fruits and vegetables needed by retailers and frozen food brokers before they fall within the mandatory licensing provisions have been increased from $200,000 to $230,000.

Inspection and Other Standards for Imported Meat Products

Six months after the enactment of the 1981 Act (December 22, 1981), all carcasses, parts of carcasses, meat, and meat food products produced from cattle, sheep, swine, goats, horses, mules, or other equines offered for import into the United States and capable of being human food will be subject to the same inspection, sanitary, quality, species verification, and residue standards applied to products produced in the United States. Any meat article not meeting these standards will not be allowed to enter the United States. The Secretary will enforce this provision through random inspections for species verification and residues, and sampling and testing of internal organs and fat for residues at the point of slaughter by the exporting nation.

Protected Seeds

It is unlawful to sell, attempt to sell, or advertise by a variety name in interstate or foreign commerce, uncertified seed from a plant variety specified for sale unless certification under the Plant Variety Protection Act has been obtained. There are two exceptions—if the seed is in a mixture or the owners of the variety gave their approval.

Foreign Plant Pest Protection

The Secretary has new authority to seize, quarantine, treat, and take other remedial measures to destroy or otherwise dispose of an infestation of new plant pests with respect to any product, article, means of conveyance, or premises which the Secretary has reason to believe is infested or infected by any such plant pest. All action must be consistent with the Federal Insecticide, Fungicide, and Rodenticide Act. This authority will be in effect only if States or other local jurisdictions are not taking adequate action, and consultations have been held with the Governor of the State. The Secretary may take action on any premises and stop and inspect intrastate travelers without a warrant if there is cause to believe treatment or disposal of any article in conveyance is needed. The Secretary must notify the State Governor and issue a public announcement before such action is
taken. All costs will be borne by the Federal Government. Compensation may be provided for economic losses.

Bee Germ Plasm

The Secretary is allowed to release the germ plasm of new strains of bees that have been produced to be highly productive, gentle, and able to better withstand northern winters.

User Fees for Reports and Publications

The Secretary may charge fees as deemed necessary for reports and publications prepared by the Department to carry out agricultural research and statistical reporting requirements. Funds received through this action may be used to directly pay for such work.

TITLE XII.
AGRICULTURAL EXPORTS AND PUBLIC LAW 480

Provisions included in this title are new unless otherwise indicated.

Agricultural Export Credit Revolving Fund

An export credit revolving fund is authorized to be established in the Treasury for use by the CCC, without fiscal year limitations. This fund will be used to finance the export sales of U.S. agricultural commodities from both private and CCC stocks, on credit terms not to exceed 3 years, export sales of breeding animals (including freight charges to designated ports of entry), and the establishment of import facilities in importing countries, through the use of local currencies generated from U.S. agricultural commodity sales, to improve the handling, marketing, processing, storing or distribution of agricultural commodities produced in and exported by the United States.

The fund is to be used only to extend credit for purposes of market development and expansion where there is a substantial potential for developing or enhancing regular commercial markets. At least 85 percent of the estimated fund, during any fiscal year, is to be used to extend 3 year credit for commercial export sales of U.S. agricultural commodities. No more than 25 percent of the fund, during any fiscal year, may be made available for financing credit sales to any one country. The appropriation to the revolving fund of such sums as may be necessary to extend such credit is authorized. All funds received in payment for credit extended using the revolving fund, including interest payments, will become part of the fund. Obligations under this authority may be incurred only to the extent provided in annual appropriations acts. No specific authorization was made for the initial appropriation of this program. An annual report to Congress on the use of the revolving fund must be submitted by December 1. Upon the revolving fund's expiration on September 30, 1985, all unobligated money in the fund will revert to the Treasury.

Bilateral Commodity Agreements

The President is encouraged to notify and consult with the appropriate Congressional Committees, as soon as practicable, before the U.S. Government enters into bilateral international agreements, other than treaties assuring access to U.S. agricultural commodities on a commercial basis.
Special Standby Export Subsidy Program

The Secretary is required to develop a special standby export subsidy program, to be carried out by the CCC, for U.S. agricultural commodities to neutralize the effects of subsidy programs instituted by foreign countries to encourage exports of their agricultural commodities to markets other than the United States. This authority may be used only after the President determines, under section 301 of the Trade Act of 1974, that the action is appropriate to eliminate foreign programs that have substantially displaced U.S. agricultural exports to foreign markets, or reduced prices in foreign markets materially below prices at which U.S. produced commodities could be supplied. The President must also determine that the foreign country is using export subsidies to encourage exports of such country's agricultural commodities to foreign markets other than the U.S. and fails, through consultations with the country in question, to reach a mutually acceptable resolution of the matter. This authority may not be used with respect to cotton.

Embargo Protection

The 1977 Act provides for an increase to 90 percent of parity in loan level for certain agricultural commodities if exports of the commodity are suspended as a result of a short supply to any country with which the U.S. otherwise continues commercial trade. The 1981 Act contains provisions which substantially broaden the embargo protection. This additional embargo protection is directed toward national security or foreign policy embargoes which suspends or restricts exports of any agricultural commodity. The protection will be triggered only if the sales suspension or restriction is not imposed on all U.S. exports to the specified country or area and U.S. export sales of the commodity affected to the specified country exceed 3 percent of the total U.S. export sales of the commodity during the preceding year. Under this provision restricting exports to a minor importer will not trigger the embargo protection.

If the protection program is triggered, the Secretary will be required to compensate producers of the commodity involved by either: (1) establishing a loan level under the Agriculture Act of 1949, at 100 percent of parity as of the date of the suspension for the commodity if a loan program is in effect; (2) making payments to producers; or (3) providing a combination of increased loan levels and payments. Payments will be determined for those commodities authorized payments under Title I of the 1949 Act by multiplying the payment yield by the program acreage for the commodity and that figure times the amount by which the average market price received by producers during the 60 day period immediately following the suspension is less than 100 percent of parity as determined on the day of suspension. Payments for other commodities for which price support is authorized by the 1949 Act will be the amount by which the average market price for the commodity during the 60 days immediately following the suspension is less than 100 percent of parity multiplied by the quantity of the commodity sold by the producer during the suspension period. Payments made under this provision would be made for each marketing year or part thereof during which the suspension or restriction is in effect and in equal amounts at 90 day intervals, starting 90 days after the action is imposed. The increased loan levels would remain in effect...
at the higher level for the duration of the suspension or restriction. Loans at the increased level would be interest free.

**Development of Plans to Alleviate Embargo Effects**

The 1981 Act requires that the Secretary of Agriculture develop a comprehensive contingency plan that examines ways to alleviate adverse affects of export embargoes on farmers, elevator operators, common carriers, and exporters of agricultural commodities. The plan is required to assess existing farm programs to see if they are sufficiently flexible to offset the impact, determine the information that would be needed to evaluate the impact, and develop the criteria for determining how much of the impact should be offset. For sales suspensions not requiring the special embargo protection compensation in the 1981 Act, the Secretary is required to develop and submit to Congress recommended changes in agricultural programs or new programs to handle the impact of an embargo. Plans must also be submitted to Congress on how the embargo protection programs specified under the 1981 Act will be implemented and administered, as necessary.

Finally, the CCC would have to prepare a report economically justifying the purchase of contracts to offset an embargo's effects. The effects on exporters of such action and possible Federal assistance must also be estimated. The CCC must limit its purchases to only those types and grades of commodities suspended, and the purchase price must be at or near the current market price.

**Grain Marketing Consultation**

The Congress encourages the Secretary to continue consultation in coordination with other Federal Departments between major grain exporting nations, including the United States, on how to move toward a more orderly marketing of grain and achieve higher farm income for grain producers.

**Expansion of International Markets**

The Secretary is urged to utilize the intermediate credit program to improve the capability of importing nations to purchase U.S. commodities, requests funds for the export credit revolving fund; open the maximum allowed number of Agricultural Trade Offices in other nations; ensure full utilization of the levy-free quota for export sales of high quality beef to the European Economic Community (EEC); expand the Department's Foreign Agricultural Service (FAS) market development activities; insure that the EEC observes its General Agreement on Trade and Tariffs (GATT) commitments on tariff-free soybean and corn gluten feed imports; consult with Japanese Government officials on increasing U.S. export sales of citrus fruit and high quality beef and on developing mutually acceptable standards for certification of lettuce and other specialty crops for export to Japan, and use the authority of section 32 to establish a special standby export subsidy program.

**Increased Usage of Protein Byproducts**

The Secretary of Agriculture is required to continue the investigation of the potential for using protein byproducts resulting from the production of fuel alcohol from agricultural commodities to meet the food needs of developing countries through food for peace programs carried out under PL-480.
section 4 of the Food for Peace Act of 1966, and CCC auth-
orities and in the distribution of food products under domestic
commodity donation programs.

No later than 12 months after enactment of this Act, the
Secretary is required to make a report to Congress which includes
the results of the investigations undertaken. Thereafter, the
Secretary must provide to Congress, each year, a description of
the efforts being made by the Department to make available the
protein byproduct as a part of the above-mentioned programs.

Title XII, extends the Agricultural Trade Development and
Assistance Act of 1954, more commonly known as PL-480, through

The authorization ceiling per calendar year, for Title II programs
has been increased from $750 million to $1 billion.

The value of CCC commodities used in the PL-480 program may be
set at a price not greater than the export market price. This
change in legislation should allow an increased volume of CCC-
owned commodities to be used since under previous law the value
of CCC commodities used in PL-480 had to be set at the export
market price.

Distilled spirits and other alcoholic beverages will be eligible
for market development activities as beer and domestic wines
have been in the past. Those activities are to help expand the
export sales of U.S. agricultural commodities.

Finally, the self-help provisions associated with the P.L.-480
program have been strengthened to insure that the receiving
nation practices various means of development while receiving
PL-480 aid. Two additional measures were included for consider-
atation before entering agreements under this provision—programs
to reduce illiteracy and improve the health of the rural poor.
Self-help measures must satisfy additional requirements and
together with economic development measures be described in
specific and measurable terms and insure that the needy
people will benefit from the measures. Appropriate steps must
be taken to determine whether self-help and economic development
provisions are carried out.

The annual Presidential report on PL-480 will now be due on
February 15 rather than on April 1.

Title XIII continues the Food Stamp Act of 1977, as amended. Some
changes in existing programs were made by the 1981 Act. Major
changes are highlighted below.
Alaska's Thrifty Food Plan and Fee Agents

Unlike other States and territories, Alaska will have separate thrifty food plan cost adjustments for the urban and rural parts of the State. In addition, the Secretary is mandated to provide for the use of fee agents in rural sections of Alaska. These agents would not be State employees, but would be able to conduct most program functions, except for the final determination of eligibility or benefit levels.

Nutritional Education and Monitoring

The requirement that the Secretary had to extend food and nutrition education programs to food stamp program participants has been altered to an authorization for the Secretary to use the program. But the Secretary is required to implement pilot programs to test various means of measuring the nutritional status of low income persons on a continuing basis. The Secretary is given flexibility in deciding if contracts or grants will be issued and whether public or private organizations will be used in operating the pilot programs. However, special emphasis must be placed on monitoring those eligible for food stamps. An annual report to Congress on the projects will need to be made starting July 1, 1982.

Thrifty Food Plan Adjustments

The adjustment dates and the reference periods for changing costs for the thrifty food plan have been altered. The next adjustment will be October 1, 1982, rather than April 1, as per the Omnibus Reconciliation Act of 1981, and it will reflect the 21 months ending June 30, 1982. Each subsequent adjustment will be on October 1, and will reflect changes in the cost of the plan for the 12 months ending on the preceding June 30. Congress reserved the right to readjust the base periods. The thrifty food plan is used to determine the cost of the minimum diet to feed a family of four. It is then used as a base for determining monthly food stamp allotments for qualified households.

Household Definition Change

Under the 1981 Act amendments, blind or disabled parents and parents receiving Supplement Security Income (SSI) benefits living with their children will be eligible to apply as separate food stamp households. Although in the past disabled parents could have applied separately, the Omnibus Budget Reconciliation Act of 1981 changed the provision. Under the Reconciliation Act, the definition of household was altered to include parents and children who live together, unless 1 parent was 60 years of age or older.

Income Exclusions

Federal or State energy assistance will be excluded from household income calculations. The State or local legislative body must actually designate the State payments or allowances as energy assistance and the Secretary must determine that the program is on a seasonal basis not to exceed six months in any year for the exclusion to be effective. This will also include payments not made on a seasonal basis, because of administrative problems, but calculated as if they were. In addition, any other income that Federal law specifically excludes from food stamp eligibility determination will not be counted.

Sponsored aliens in the United States will have part of the income of their sponsor and the sponsor's spouse counted when determining eligibility for food stamps if the alien is not part of the
sponsor's household. This unearned income will be included in the calculations for the first 3 years that the aliens are in this Nation. The sponsor's income will undergo the normal procedure used in determining food stamp eligibility with the alien credited with a twelfth of the amount left after 130 percent of the income poverty line for the family size in question is deducted. The amount of resources to be credited to the alien will be those of the sponsor and the sponsor's spouse minus $1,500 plus any resources the alien owns. The individual alien will be required to provide the necessary information and documentation from the sponsor and the sponsor's spouse, as well as from the immigration application, to the State agency in charge of food stamps to qualify for the program under these provisions during his or her first 3 years in the United States. The Secretary of State and Attorney General are to reach an agreement with the Secretary of Agriculture to provide any necessary information, needed to operate this section to the Department of Agriculture. The sponsor must be informed of this possibility. Both the sponsor and the alien will be jointly and individually liable for any overpayments made during the 3 initial years if the error is the result of the sponsor providing incorrect information, unless good cause for the error is shown.

Requirements are also included to mandate that adjustments made to Aid to Families with Dependent Children (AFDC) benefits for work-related and child care provisions will not be counted as expense reimbursements and thereby excluded from being counted as income for food stamp purposes. In addition, expenses paid on behalf of households by third parties will no longer be deducted from income for food stamp purposes.

**Work Requirements**

Any household in which the head is between the ages of 18 and 60 and is physically and mentally fit, and whose primary wage earner voluntarily quits a job without good cause, will be ineligible for food stamps for the first 60 days after the action is taken. Previously, only applicant households, and not recipient ones were affected. Persons who fail to meet the work requirement of some other Federal program will be disqualified from the food stamp program if the work requirements are similar. All food stamp recipients will have to register for employment every 12 months, instead of every 6.

The lack of adequate child care for children age 6 to 11 will be considered cause enough to refuse a job offer and still retain benefits. However, only persons responsible for the care of a dependent child under the age of 6 (age 12 under previous legislation) will be automatically exempted from the work registration requirement.

**Restoration of Lost Benefits**

State agencies will be required to restore to a household any full or portion of an allotment that has been wrongly denied or terminated. However, only those allotments that had the inappropriate action taken within a year of the day the household requests the agency to restore the benefits or the agency discovers the specific household loss, will be covered. This limited retroactive action will include judicial and review cases.
Information
Requirements

State agencies will be required to request and utilize quarterly wage data collected by State agencies dealing with unemployment compensation to verify food stamp recipient earnings. If the State unemployment agency does not have such information, Social Security Administration data will be used.

All food stamp coupon issuers will be required to see a photo identification card when the authorization card for food stamps is presented in those project areas where recipients are required to have a photo identification card to receive benefits. The photo ID number is to be recorded on the authorization card when presented to the food stamp issuers. If the State agency determines that an authorization card was in fact not received by the certified household, the food stamp issuer will be liable for the value of the coupons issued in any transaction using the missing card if the issuer fails to comply with the above requirements. Finally, food stamp households will be required to furnish social security numbers of all household members.

State Liability

The State agency will continue to be liable for any financial losses involved in the acceptance, storage, and issuance of coupons. In addition, the State agency will be liable to the Secretary for any losses resulting from issuers failing to follow procedures in checking authorization cards against photo ID cards as outlined above. The only exception to this rule is for losses resulting from benefits sent through the mail. The Secretary will set up regulations to deal with that event.

Miscellaneous

The Secretary will no longer be specifically required to determine staffing standards, such as caseload per certification worker, as in the 1977 Act. The Secretary's authority to purchase and distribute food commodities to a number of commodity distribution outlets, such as disaster relief areas, institutions, and summer camps for needy children, is continued through September 30, 1985.

Institutions insured by the Federal Savings and Loan Insurance Corporation, as well as those insured by the Federal Deposit Insurance Corporation, will be eligible to accept food stamps for redemption from retail stores. This broadens the use of financial institutions. In the past only banks could provide this service.

Safeguards to limit disclosure of information will not prevent the use or disclosure of such to the Comptroller General of the United States for examination and audit as authorized by law.

Incentives for Error Reduction

All States will have to develop corrective action plans for further reductions in errors to qualify for more than the standard Federal funding of their administrative costs, unless their rates of administrative error are below 5 percent of benefit payments. The current standard Federal funding share is 50 percent. In addition, to receive additional Federal funding of administrative costs, all States will have to meet the Secretary's requirements for low rates of improper denial.
All funds collected from claims owed to the Department by households or State agencies, including those from over-issuances, will be credited to the food stamp program appropriation for the year in which the collection occurs. All incentive payments made to States because of low rates of administrative error will be paid from the appropriation account for the fiscal year in which the funds are provided.

Retail food stores dealing with food stamps must display a sign providing information on how food stamp abuses can be reported. Each food stamp application must prominently display a statement which explains that all information the applicant provides is subject to verification, and that any subsequent finding of false information may lead to a denial of food stamps and possible criminal prosecution. All information the applicant provides will also now be available on request to law enforcement officials who are investigating possible violations of food stamp law and/or regulations.

Persons found guilty of criminally misusing food stamp coupons or authorization cards will now be subject to a mandatory minimum jail sentence of 6 months for any convictions after the first, involving amounts totaling $100 or more. The maximum jail sentence of 5 years and a maximum fine of $10,000 still apply for the first and subsequent convictions. A person convicted more than once of offenses involving coupons worth less than $100 must be sentenced to jail, but for not more than 1 year. The maximum jail sentence of 1 year and a maximum fine of $1,000 still apply for the first and subsequent offenses. Any person convicted of a violation regardless of the amount may be suspended by a court from receiving program benefits for up to 18 months in addition to the previously mandated 3 month suspension. Convicted individuals may be permitted by the court to perform approved work to provide restitution for losses incurred by the program because of the offense. This work would be done in place of carrying out the sentence imposed by the court.

Anybody who knowingly presents or causes the presentation of coupons which have been transferred, received, or used in an unlawful manner will be guilty of a felony if the value of the coupons is $100 or greater. For a conviction on a first offense there will be a fine not to exceed $10,000 and/or imprisonment for no more than 5 years, as with the statute dealing with misuse of coupons and allotments. For second and subsequent offenses a minimum jail sentence of 1 year, but no more than 5 years, and a possible fine of up to $10,000 will be imposed. Second and subsequent convictions of this type for coupons worth less than $100 will result in a jail sentence not to exceed 1 year and a possible fine not to exceed $1,000. The first-time offender faces the possibility of both actions, but no penalty is mandated. Again, an additional 18-month suspension from program benefits is possible.

Persons who misuse federally donated commodities will be subject to criminal penalties of a fine of up to $10,000 and/or not more than 5 years imprisonment if the commodities are valued at $100.
or more. Fines of up to $1,000 and/or no more than 1 year in prison face those convicted of misusing donated commodities valued at less than $100.

**Workfare**

The Secretary is mandated to allow workfare programs to be established in political subdivisions that wish to participate. The Secretary will set up guidelines for the programs. Every member of a household which is participating in the food stamp program would have to accept an offer of work from the local government operating the program. The work would either be for the county or local government, or the individual may seek an offer to perform, and be compensated by each hour, work being equal to a portion of the food stamp allotment. The portion would equal the higher of the State or Federal hourly minimum wage rate. The only household members that may be exempted from this requirement are those that may be mentally or physically unfit; subject to and currently involved in a work training program under a work registration requirement involving at least 20 hours per week participation; a parent or other household member responsible for the care of a child under 6 years old or an incapacitated person; a parent or other caretaker of a child in a household where another member is either employed full time or subject to workfare; regular participants in drug abuse or alcoholic treatment and rehabilitation programs; or a student enrolled at least half time in specified programs.

The requirement for work cannot exceed the value of the allotment to which the household is entitled. In addition, the requirement cannot exceed 20 hours per week or exceed 30 hours per week when combined with other regular or predictable part-time work. The work cannot replace or prevent the employment of people not in the workfare program. The work must provide the same benefits and working conditions that are provided at the job site for employees performing comparable work for comparable hours. The operating agency will have to reimburse all transportation and other actual participation costs, but this is not to exceed $25.00 per month.

The operating agency may allow a job search period of up to 30 days after determining workfare eligibility. If an eligible person fails to participate in the workfare program, both the individual and the household will be ineligible for food stamp benefits for 2 months. To avoid the consequence, a household member would have to satisfy all outstanding obligations prior to the end of the disqualification period. The Federal Government will pay 50 percent of the administrative costs of this program, including the transportation and other cost reimbursements. If a political subdivision fails to comply with program regulations, the Secretary may either cancel or suspend payments or withdraw program approval.

**Changes in "Cash Out" Pilot Program**

States may continue to operate pilot projects, which were operating as of October 1, 1981, which involve cash payments to households instead of food stamps through the end of fiscal year 1985 for households in which all members are 65 years of age or older, or all members receive supplemental security income benefits (SSI). In addition, these cash out type projects may now
also be tested on households in which any member receives aid to families with dependent children (AFDC) or SSI benefits. Also, food stamp projects paying benefits in standardized cash amounts, varying only by household size, will be eligible. The Secretary has discretionary authority to waive food stamp program requirements if necessary for program operation. But further restriction on income or resource benefit levels is ruled out.

The Secretary is authorized to start 2 commodity supplemental food pilot projects directed at low-income elderly persons similar to that for low-income pregnant women, new mothers, infants and children. Where it is feasible, distribution of commodities directly to the elderly's homes will be attempted. These new projects will operate for no more than 2 years. The authority to provide administrative funds to operate the program for nonelderly recipients is extended through September 30, 1985. Funds are to originate from annual appropriations and are to be sent to State agencies. In no case will funds supplied for administrative purposes be equal to more than 15 percent of the appropriated funds for the commodities being used.

The Secretary is authorized to establish two statewide pilot projects and 14 pilot projects in county or local areas to test a system whereby households with at least one member receiving AFDC, SSI, or Medicaid benefits and which have household incomes below the applicable income eligibility level, would automatically qualify for food stamp benefits. The benefits would be standardized and based at the State's option on either household size and their AFDC benefits or SSI benefits or Medicaid income eligibility requirement, or the programs applicable standard of need. Benefits under this program must be adjusted so that they are not less than they would be if normally determined. The Federal Government will pay part of the administrative costs. The Secretary must evaluate the impact of such programs on households, costs, and error rates.

Eligible households which move from one political jurisdiction to another will no longer be guaranteed uninterrupted benefits for the first 60 days after the move. State agencies will still have to notify recipient households that their current certification period is expiring, but the notification will not have to be made immediately before the household must reapply to retain uninterrupted benefits.

The authority to purchase and distribute food commodities to commodity distribution outlets, including disaster relief areas, institutions, commodity supplemental food programs, and elderly nutrition projects, has been extended through the end of fiscal year 1985.

The Secretary is authorized to establish a food distribution program to provide food commodities to eligible Indian households and any other appropriate households in Oklahoma. No tribal organization may administer such a program unless the Secretary determines the organization is capable of effectively and efficiently providing the service. Authorization is provided for payment of administrative costs for the program for a tribal
organization which are necessary. No household will be permitted to participate in both the food stamp and this program.

Inspector General Authority

Any person employed by the Department of Agriculture's Office of Inspector General who conducts investigations of possible felony criminal violations of statutes administered by the Department and is designated by the Inspector General may now make arrests without warrants for such criminal violations if the action is committed in the presence of the employee or there is reason to believe the violation is occurring. In addition, warrants for arrests, searches, and seizures may be executed and employees may also carry firearms while engaged in the performance of official duties. The Attorney General may disapprove any such designation.

Appropriation Authorization

The authorization for appropriations for the food stamp program is extended for 1 year (fiscal year 1982) - at $11.3 billion.

Effective Date

The Secretary will have discretionary authority to implement program provisions over time, unless otherwise specified.

TITLE XIV.
NATIONAL AGRICULTURAL RESEARCH, EXTENSION, AND TEACHING POLICY ACT AMENDMENTS OF 1981

Title XIV amends the National Agricultural Research, Extension and Teaching Policy Act of 1977 and various other statutes relating to research, extension and teaching programs. Most of the provisions in the 1977 Act and the other statutes are permanent legislation and, except for appropriation authorizations, need no continuing authority. However, some changes in existing programs have been made, most expiring provisions have been continued, and some new programs have been added. The following highlights the major changes.

New Assistant Secretary

The President, by and with the consent of the Senate, shall appoint an additional Assistant Secretary of Agriculture with jurisdiction over the areas covered by the National Agricultural Research, Extension, and Teaching Policy Act of 1977, as amended.

Continuing Councils and Boards

The Joint Council on Food and Agricultural Sciences, the National Agricultural Research and Extension Users Advisory Board, and the Animal Health Science Research Advisory Board are authorized to continue to function until September 30, 1985. The membership of these councils and boards is largely determined by law and selected from organizations or agencies associated with the field in question. Minimum membership for the Joint Council is now set at 25 representatives and the National Agricultural Research and Extension Users Advisory Board membership is increased from 21 to 25. The length of the appointment on the Joint Council will be for up to 3 years. The terms for the
Council and the Research and Extension Users Board will be staggered so that membership is changed gradually.

The authority for the awarding of competitive research grants of up to 5 years in duration, to promote food and agricultural research, is continued through September 30, 1985. The appropriation level is to continue at $50 million per fiscal year. Research foundations established by land-grant colleges and universities and accredited colleges of veterinary medicine are now eligible for special research grants.

Forestry schools and 1890 colleges, including Tuskegee Institute, will join State agricultural experiment stations and accredited colleges of veterinary medicine as eligible recipients of grants for renovation and refurbishment of research spaces, purchase of fixed equipment, and construction of auxiliary facilities. The authorization of appropriations for grants for alcohol and industrial hydrocarbons production research will continue through September 30, 1985, with Federal laboratories now eligible, as well as colleges, universities, and Government corporations. The total amount of appropriations for alcohol and hydrocarbon research cannot exceed $40 million for the 10 year period beginning October 1, 1977, and no more than $5 million can be awarded to the colleges and universities of any one State.

The authorization of appropriations for research on specific national or regional animal health or disease problems is increased to $35 million annually, up from $15 million. This authorization covers the period from October 1, 1981, to September 30, 1985. The funds will be awarded in the form of grants not to exceed 5 years. A list of priorities to be researched will be developed to insure rational allocation of funding. The provision that at least 50 percent of the grant money designated for use in expanding or establishing veterinarian schools go to States which already have institutions so accredited has been deleted. During fiscal years 1982 through 1985, the authorization for appropriations for continuing animal health and disease research programs at eligible institutions will be up to $25 million annually. Although this funding level represents no change from the 1977 Act, the inclusion of termination dates is new. Eligibility for annual funds for continuing animal health and disease research, and for grants for research on specific national or regional animal health or disease problems is now limited to credited schools or colleges of veterinary medicine and state agricultural experiment stations.

The annual authority for appropriations for grants and fellowships in food and agricultural science education will continue at $50 million through September 30, 1985. The Nutrition Education Program is continued. However, the nutritional education material program for elementary and secondary schools has been eliminated. In addition, the functions and duties of the Secretary of Education under Section 22 of the Bankhead-Jones Act and the Second Morrill Act are transferred to the Secretary of Agriculture.
Authorization for Appropriations--
General funding for agricultural research is authorized through fiscal year 1985. The amounts of authorizations start at $780 million for each fiscal year 1982 and 1983, and increases $55 million per year until reaching $890 million for fiscal year 1985. Authorizations for appropriations for research at State agricultural experiment stations are also continued through fiscal year 1985. The level of authorization begins at $220 million in fiscal year 1982 and increases $10 million per year until reaching $250 million for fiscal year 1985. In addition, beginning October 1, 1983, 25 percent of the total funds appropriated in any fiscal year for specified programs, such as cooperative research and animal health research, must be directed to State agricultural experiment stations.

Extension program authorizations for appropriations are continued through fiscal year 1985. This level of authorization begins at $350 million in fiscal year 1982 and increases $10 million per year until reaching $380 million for fiscal year 1985.

Other Appropriations
The Research Facilities Act of 1963 will continue to be authorized to receive annual appropriations of $31 million per fiscal year to be distributed to eligible institutions through September 30, 1985. Funding for support of agricultural and forestry extension at 1890 colleges, including Tuskegee Institute, will be increased from 4 percent to 5.5 percent of the total appropriations made under the Act of May 8, 1914, for fiscal year 1982 and 6 percent for fiscal years 1983 through 1985. Plans for the extension work to be carried out by such institutions will be submitted as part of the state plan of work. New authority is provided and appropriations are authorized for the 1890 colleges to receive $10 million in grants annually for fiscal years 1982 through 1986 for the upgrading of their research facilities. None of these funds may be used to cover overhead expenses. Authorization for appropriations for solar energy model farms and demonstration projects will continue through September 30, 1985.

New and Expanded Programs
The Secretary is directed to take the initiative in overcoming barriers to long range planning by developing long term needs assessments with other institutions for food, fiber, and forest products, and determining what research will be required. The Secretary's annual report that will be submitted by January 1, 1984, must detail the provisions of the long term needs assessment. The Secretary will now be required to conduct regular program evaluations to insure that the purposes and responsibilities assigned to the Secretary by this title are carried out. In addition, the Secretary is authorized to encourage regular evaluations of programs among the colleges, universities, State agricultural experiment stations, and cooperative extension services. The Secretary is further given general authority to award contracts, grants, or cooperative agreements of a maximum length of 5 years to all eligible institutions to further research, extension, or teaching programs in food and agricultural sciences.
Aquaculture

An aquaculture subtitle is included to encourage landowners, individuals, and commercial institutions to develop aquaculture production, facilities, and sound aquaculture practices that will, through research and technology transfer programs, provide for the increased production and marketing of aquaculture food products. This is an addition to the appropriations authority provided in the 1977 Act.

The Secretary may develop a cooperative research and extension program in accordance with the national aquaculture development plan developed under the National Aquaculture Act of 1980. He may also make grants to colleges, universities, agricultural experiment stations, and Federal laboratories to conduct aquaculture research and extension. These grants are contingent, except for grants to Federal laboratories, on State matching grants. He may also make grants to States on a matching basis to assist the formulation of aquaculture development plans. The aggregate amount of grants made to anyone State for such development plans may not exceed $50,000.

This subtitle also provides for the establishment of an aquaculture advisory board of 12 members from specified groups. The term of the board expires September 30, 1985, with meetings to be held at least annually. $7.5 million is authorized to be appropriated each year through fiscal year 1985 for this subtitle. The Secretary is required to submit an annual report by March 1 to the President and Congress, detailing progress made in this area.

Dairy Goats

The Secretary is mandated to make annual grants to the 1890 college, or to Tuskegee Institute that has initiated a dairy goat research program on the effective date of the 1981 Act to support the conduct of dairy goat research. The grants will be paid in quarterly installments and each year's funding must be totally accounted for within 60 days of the fiscal year's end. Funding is authorized for fiscal years 1983 through 1985 in an amount equal to one percent of the aggregate amount appropriated each year for agricultural research at the 1890 land-grant colleges, including Tuskegee Institute.

Rangeland Research

A new rangeland research program is authorized. A number of studies are to be made in conjunction with this program including: (a) management of rangeland and agricultural land as an integrated system for efficient production; (b) efficient management of rangeland watersheds; and (c) revegetation and rehabilitation of rangelands. The research will be funded through grants--50 percent Federally funded with the remaining 50 percent from non-Federal sources. Appropriations for this program are authorized in the amount of $10 million each fiscal year through September 30, 1985. An annual report to the President and Congress on the operation of the program will be submitted by March 1. In addition, a Rangeland Research Advisory Board will be established with an authorized existence until September 30, 1985. It will consist of 12 members and meet at least once a year.
### Soybean Research Institute

A soybean research advisory institute will be established temporarily. Its mission must be completed and reported by March 1, 1983. The institute will consist of 11 members appointed by the Secretary. It will examine ways to increase soybean production, look at impediments to increased production, and assess soybean research programs. In addition, an international conference on soybean research will be developed and sponsored.

### Rural Development and Small Farm Programs

Title V of the Rural Development Act of 1972, as amended, relating to rural development and small farm research and extension programs is amended to add a special grants program to strengthen research and education on national and regional issues. The responsibility for administering each State's rural development and small farm research program is placed on the land-grant college in the State. If there is more than one, responsibility is to be determined by mutual agreement. All colleges and universities are eligible to participate in this program. There are authorized to be appropriated such sums as are necessary in carrying out this program.

### Human Nutrition Research

The Secretaries of Agriculture and Health and Human Services must submit to Congress a plan for a human nutrition research management system within 180 days of this Act's enactment. The system must be capable of allowing for fiscal accounting, management, and control of cross-agency human nutrition research activities.

The Secretary may establish cooperative human nutrition centers to focus resources and facilities on particular high priority nutrition problems. The centers will be established at State cooperative institutions and other colleges and universities that have demonstrable capacity in human nutrition research and education.

### Reporting Date Changes

The Joint Council's annual report must be submitted to the Secretary of Agriculture no later than June 30, rather than December 31. The June report will recommend priorities for research and extension, teaching programs, and the levels of funding needed. An additional annual report will be required which will describe ongoing programs and future expectations. This second report will be due by November 30. Furthermore, the Council must submit a report by June 30, 1983 outlining a 5 year plan for food and agricultural sciences. This report will be updated every 2 years. The National Agricultural Research and Extension Users Advisory Board's annual report to the President and Congress must be submitted by February 20, rather than March 1, and their report to the Secretary must be submitted by July 1, rather than October 31. The Secretary of Agriculture's annual report to the President and Congress highlighting the Nation's agricultural research, extension, and teaching activities must be submitted by January 1, rather than February 1.

### TITLE XV. RESOURCE CONSERVATION

The following are all either new legislation or represent significant changes in the 1977 legislation. In the 1981 Act, conservation measures are directed more toward special areas.
This provision allows the Secretary to establish soil, water, and related resource conservation programs in designated special areas, by providing technical and financial assistance to owners and operators of farms, ranches, and certain other lands at their request. Contracts for aiding owners and operators are to be designed to provide assistance in allowing them to make voluntary changes in their cropping systems in order to conserve or protect the soil, water, or related resources of the land. The basis for these contracts will be a conservation plan approved by the Secretary as well as the appropriate soil and water conservation district.

In designating a geographical area as a special area, the Secretary must review the National Resources Inventory data, river basin plans, special studies, and other resource information. He must consider the amount of soil loss prevented, acres protected, and the volume of water conserved. He must also evaluate the degree and type of interagency cooperation needed, the degree of local acceptance of the planned target activity, as well as significant favorable and adverse impacts. The Secretary must then prepare and publish a report assessing the problems, objectives, and priorities of the area under consideration as well as a schedule of implementation. The report must indicate how the program takes into consideration ongoing programs of Federal, State, and local agencies, including soil conservation districts, relating to soil and water conservation, pollution abatement, or the improvement or protection of forest land. The Secretary must, to the extent possible, assure that all of the Department's conservation programs operating in a designated special area complement outlined conservation objectives.

In return for the owner/operator's agreement, the Secretary will share the cost of carrying out conservation practices. Special areas may be designated at any time from the enactment of the provisions of this subtitle to September 30, 1991, and contracts may be written up to 10 years after the designation of a special area. The Secretary must submit each special area report to the agricultural committees of both houses of Congress at least 45 days before entering into any contracts within that area.

The Secretary may utilize the services and facilities of the CCC in carrying out these provisions. The Secretary must also submit a report to Congress by January 1, 1986, and at the end of each successive 5 year period, evaluating and recommending future policy directions.

The Watershed Protection and Prevention Act is expanded to include Indian tribes or tribal organization. The monetary ceiling for projects that may be administratively approved and do not require reports to Congress is increased from $1 million to $5 million. Additionally, the Secretary is permitted to bear half the cost of acquiring easements or rights-of-way by local organizations in lessening the impact on fish and wildlife habitats. Conservation and energy development were added as authorized objectives to be included in conservation plans and agreements based thereon between the USDA and landowners.
Matching Grants for Conservation Activities

The Secretary may formulate and implement annual grants to local units of government through State conservation agencies for furthering soil, water, and related resource conservation. These grants must augment, rather than replace, other technical and financial programs of the Department of Agriculture.

A local unit of government is eligible if it: (1) has in effect a current long-range program which the State soil conservation agency determines is adequate to meet local and State laws and objectives; (2) has in effect a current annual work plan consistent with the long-range program of part 1; and (3) certifies to the Secretary, or his designee at the State level, that it has arranged for equal matching funds or in-kind services from regional, State, local, or private sources. If the Secretary determines that the long-range program or annual work plan involves primarily a national rather than a local or State objective, then State or local funds need not exceed 25 percent of the total.

Long-range programs and annual work plans may include any of the following soil, water, and related resource conservation objectives: (1) soil erosion prevention and control; (2) cropland, forest, woodland, pasture, or rangeland improvement; (3) water conservation, development, and management, and water quality improvement; (4) agricultural land retention or preservation; (5) demonstration projects to test or publicize the effectiveness of natural resource management systems adapted to local conditions; (6) fish and wildlife habitat improvement; (7) animal waste management; (8) watershed protection and flood prevention; (9) sediment control and stormwater management in urbanizing areas; (10) environmentally sound energy conservation and production; (11) leadership in natural resources aspects of rural community planning and development; or (12) any other purpose authorized or required by local or State conservation laws. If it is determined that an objective may take more than 1 year to complete, the Secretary or his designee may enter into a long-term funding agreement of not more than 10 years with the State or local unit of government contingent upon appropriations. Matching grants between the Federal Government and the State may be used for technical assistance.

The Secretary must report on the progress of this subtitle to the agricultural committees of both houses of Congress on January 1, 1986, and again on January 1, 1991.

Conservation Loan Program

The CCC may make loans of up to $25,000 for not more than 10 years to producers in order to alleviate natural resource conservation problems that reduce the productive capacity of the Nation's land and water resources or that cause degradation of environmental quality. These loans can be made upon recommendation of applicable county and State committees established under section 8(b) of the Soil Conservation and Domestic Allotment Act and are included in the producers conservation plan approved by the local soil and water conservation district. Loans up to $10,000 may be unsecured. The total of all loans for each fiscal year should not exceed $200 million.
The Secretary is authorized to identify no more than 5 publicly owned reservoir and drainage areas where sedimentation is a critical problem and develop a plan for reducing the sedimentation problem in those reservoirs after consultation with State and local units of government. The Secretary shall, additionally, submit a progress report to the agricultural committees of both houses of Congress for their approval prior to beginning work. On January 1, 1987, the Secretary must submit a report to Congress with a recommendation for future action.

The Secretary is authorized to accept volunteers for any program within the Department, without compensation, as long as such service is not used to displace any employee including local, county, or State committee. Volunteers will not be considered Federal employees except in regard to injury compensation.

In developing a soil, water, and energy conservation policy plan the Secretary of Agriculture, in consultation with various units of State and local government, as well as nonprofit organizations, is required to establish no more than 225 active designated areas. In these areas, specific problems of soil erosion and water and energy management will be ascertained. Technical and financial assistance in order to conserve and improve the land, develop natural resources, and improve and enhance the social, economic, and environmental conditions in rural areas will be provided. Loans appropriated for this title will not exceed $15 million for each of the fiscal years beginning October 1, 1982 and ending September 30, 1987. When designating an area, the Secretary must publish an assessment of the scope of the problem as well as propose possible remedies. The Secretary must submit to both houses of Congress a progress report plus recommendations by December 31, 1986. A board consisting of 7 members, who are employees of the Department, and selected by the Secretary, will advise the Secretary on the administration of the Resource Conservation and Development Program.

The Department, as well as other Federal agencies, should review and take measures where needed to ensure that activities of the Federal Government do not cause U.S. farmland to be irreversibly converted to nonagricultural uses when those other uses do not override the importance of maintaining farmland resources. The Department, in cooperation with other units of the Federal Government, will develop criteria for identifying the effects of Federal programs on farmland conversion. The Department will design and implement educational programs and materials which stress the importance of productive farmland to the Nation's wellbeing. The Secretary is also empowered to create one or more farmland information centers to serve as central depositories for conservation information. Such measures should be compatible with State and local Government efforts to preserve farmland. This does not give the Federal Government the right to regulate the use of nonfederal or private land. This portion of the farm bill will become effective 6 months after enactment of the legislation (June 22, 1982) and the Secretary must report to both houses of Congress 1 year after the effective date.

<th>Section</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Local Search and Rescue Operations</td>
<td>The Secretary is authorized to assist in local search and rescue operations through the use of Soil and Conservation Service personnel, vehicles, and other equipment when requested by local authorities.</td>
</tr>
<tr>
<td>Reclamation</td>
<td>The Surface Mining Control and Reclamation Act of 1977 is changed to allow experimental reclamation on lands within a single hydrological unit of up to 25,000 acres if the Secretary determines such treatment would have a greater beneficial impact than being confined to individual parcels of land.</td>
</tr>
<tr>
<td>Payments for Land Removed from Production for Conservation Purposes</td>
<td>The Secretary is authorized to make payments to owners and operators of cropland, that normally freezes to a depth of at least 4 inches, who remove that cropland from agricultural production for the purpose of installing enduring conservation measures involving excavation of the soil. Payment will not exceed an amount equal to the number of acres of cropland removed from agricultural production multiplied by 50 percent of the typical annual rent paid for similar land in the county. Total payments for such purposes cannot exceed one-half of 1 percent of the total cropland in any county in any year. Financial assistance also must be approved by the Soil and Water Conservation district board in which area the land is located.</td>
</tr>
<tr>
<td>Conservation Tillage</td>
<td>Congress urges the Secretary to inform farmers on the costs and benefits of using conservation tillage to control soil erosion and improve productivity. In addition, a research program should be instituted to resolve any questions that arise when comparing this practice to other conservation methods.</td>

**TITLE XVI. CREDIT, RURAL DEVELOPMENT, AND FAMILY FARMS**

The following sections reflect changes in programs rather than the institution of new programs.

<table>
<thead>
<tr>
<th>Section</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Farmers Home Administration Real Estate and Operating Loans to Cooperatives</td>
<td>Cooperatives will no longer be required to have an ownership and operating interest in a family farm size operation to be eligible for farm ownership or operating loans. However, the majority interest in the cooperative will still have to be held by owner/operators of family farms and the cooperative must be unable to obtain sufficient credit elsewhere to be eligible.</td>
</tr>
<tr>
<td>Rural Telephone Bank</td>
<td>The limit on the total amount of Class A stock that the Rural Telephone Bank may issue is raised from $300 million to $600 million. The Government will have extended authority to purchase such stock until September 30, 1991. The date after which the stock must be retired as soon as practicable has been extended from September 30, 1985, to September 30, 1995.</td>
</tr>
<tr>
<td>Family Farm Policy</td>
<td>Congress reaffirms its support of the family farm. An annual report will continue to be submitted by the Secretary by July 1, highlighting trends in family farm operations, nonfamily farm data, and other appropriate information. The report must also show how agricultural programs and Federal laws affect the family.</td>

</tbody>
</table>
farm system and encourage the growth of nonfamily farm operations and investment.

**Farm Credit to Widows**

Access to the Federal Farm Credit Program will be the same for widows and other single parents as it is for married persons.

**Lease of Facilities**

The Secretary is authorized to allow long-term leasing of facilities financed under the Consolidated Farm and Rural Development Act if it is needed to ensure continuation of services for which financing has been extended to the lessor.

**Borrowers Net Worth**

All applicants for loans under the Consolidated Farm and Rural Development Act must now submit written statements showing their net worth.

**Emergency Credit**

The Emergency Agricultural Credit Act of 1978 is extended through September 30, 1982. However, the Secretary may not make any new contracts or credit guarantee which would cause the total expenditure to be greater than $600 million in any fiscal year.

**Farm Storage Facility Loans**

The Secretary is mandated to make farm storage facility loans in areas where a deficiency of such storage space exists. Under the 1977 Act, the Secretary was mandated to conduct a farm storage facility loan program to encourage the storage of various farm commodities. However, the Omnibus Budget Reconciliation Act of 1981 gave the Secretary discretionary authority to conduct the program.

---

**TITLE XVII. FLORAL RESEARCH AND CONSUMER INFORMATION**

This new title establishes a Floraboard of not more than 75 industry members, representative of commodity groups within the industry, in order to conduct research, educate the public, and promote the use of plants and flowers. Producer representation of a commodity group on the board must exceed importer representation of a commodity group at all times. An executive committee of 15, selected by members of the Floraboard from among their own ranks, is also established. Funding for the activities of the Floraboard is through an assessment on plant and flower producers and importers set for the first 2 years at one-half percent, and never exceeding 1 and one-half percent of retail sales, minus production or purchase costs of plants and flowers. (The assessment may not be increased more than .25 percent annually.) Any producer or importer, whose total sales of flowers and plants do not exceed $100,000 during a 12 consecutive month period prior to the date an assessment is due and payable, can be exempted from this levy but lose their right to vote in referendums. Money collected by the Floraboard cannot be used to influence governmental policy or actions, except to seek amendments to the order. Any producer or importer who pays an assessment may demand or receive a refund if such a demand is made in accordance with the requirements in the regulations. The Floraboard must make the refund within 60 days of being provided proof an assessment was paid.
Orders desired to be issued by the industry, within the require-
ments of this title, will be offered through the use of a refer-
endum. Two-thirds of those members voting must signify their
approval before an order can become effective. This may also
be a simple majority vote if the majority accounts for two-thirds
of the production or importation value of plants and flowers.

The Secretary can suspend or terminate any order he feels
obstructs or does not effectuate the purposes of this title.
The Secretary may also hold a referendum at the request of at
least 10 percent of the producers and importers in order to
consider termination or suspension of an order by a majority of
those voting.

The United States District Courts are vested with the jurisdic-
tion to enforce this title. Any person violating the orders or
regulations issued by the Secretary under provisions of this
title may be subject to a civil penalty of $500 to $5,000. In
addition to, or in lieu of, civil penalties, the Secretary may
issue a cease and desist order. Review of such penalties or a
cease and desist order must be filed with the appropriate U.S.
Court of Appeals. Any person who fails to obey a final cease
and desist order after such order becomes final and unappealable
or after the appropriate U.S. Court of Appeals has rendered
final judgement on behalf of the Secretary, will be subject,
after opportunity for a hearing, to the imposition of civil
penalties by the Secretary of up to $500 each day that a
failure to comply continues.

The Secretary may make investigations to determine whether a pro-
ducer, importer, wholesaler, retailer, or other person is engaged,
or is about to engage in any practice which constitutes or will
constitute a violation of any provision of this title. The
Secretary is also empowered to subpoena witnesses and require
production documents.

Any person misusing information supplied to the Secretary for
the operation of this title will be subject to punishment as a
misdemeanor.
