1/ In 1990, producers had the opportunity to plant up to 105 percent of their wheat base. For each acre planted above 95 percent of the base, the acreage used in determining the producers' deficiency payment decreased by 1 acre.

2/ In 1986, the 2.5 percent paid land diversion was mandatory for participants in the wheat program. Also, participants had the option of an additional 5-10 percent voluntary paid land diversion.

3/ In 1986, the 2.5 percent paid land diversion was mandatory for participants in the feed grain program.

A USDA/ERS BRIEFING BOOKLET

THE 1990 FARM ACT AND THE 1990 BUDGET RECONCILIATION ACT

How U.S. Farm Policy Mechanisms Will Work Under New Legislation

This new 40-page booklet, explaining new farm legislation, has just been released by the Economic Research Service of the U.S. Department of Agriculture. This booklet explains the main features of the new 5-year farm law in easy-to-follow pages of illustrative material. These "verbal graphics" act as a self-programmed instruction method, as the reader easily proceeds from one point to another. The booklet works in the same general way as an informal briefing which makes its points step-by-step with overhead transparencies.

The booklet begins with an overview of the goals which motivated changes in farm legislation, accompanied by the most important mechanisms that support them.

Main goals		Basic Mechanisms
Reduce the Federal deficit	→	Reduce payment acres
Improve agricultural competitiveness	→	Permit planting flexibility; Maintain market-oriented loan rates
Enhance the environment	→	Implement Agricultural Resources Conservation Program

The booklet then proceeds with definitions and illustrations of basic mechanisms of farm policy for the next 5 years:

- o Target Price
- o Crop Acreage Base
- o Payment Limitation
- o Loan Rates
- o Zero-92
- o Deficiency Payments
- o Farmer-Owned Reserve
