Food Assistance and Nutrition Research Program

Fiscal 2011

Competitive Grants and Cooperative Agreements Program

Description and Application Process
Abstract

The Food Assistance and Nutrition Research Program (FANRP) of the USDA Economic Research Service (ERS) invites applications to conduct research that focuses on USDA’s domestic food assistance and nutrition programs. The three priority research areas are (1) Food Assistance and the Macroeconomy, (2) Food Assistance and Food Choices, and (3) Using Behavioral Economics and Incentives To Promote Child Nutrition. ERS will accept proposals under this program for funding levels, inclusive of indirect cost when applicable, between $100,000 and $300,000 (for the duration of the grant and/or the cooperative agreement, not to exceed 3 years). ERS anticipates total funding available for this research is approximately $1.5 million. The deadline for proposal submission is April 4, 2011.

Keywords: Food assistance programs, children’s well-being, macroeconomy, behavioral economics, incentives, SNAP, WIC, child nutrition programs, low-income people, Competitive Grants and Cooperative Agreements Program, FANRP, ERS, USDA
All proposals submitted under the Food Assistance and Nutrition Research Program (FANRP) must contain the applicable elements described in this brochure and should be submitted through Grants.gov by April 4, 2011. The following checklist has been prepared to assist in ensuring that the proposal is complete and in the proper order prior to mailing:

1. Application for Federal Domestic Assistance-Short Organizational (SF-424)
   - Is all required information accurate and complete?
   - Is the Catalog of Federal Domestic Assistance (CFDA) number: 10.253?
   - Has the authorized organizational representative signed the SF-424?
   - Is the CFDA Title: Food Assistance and Nutrition Research Program?
   - Have you included a telephone number, fax number, and/or e-mail address where a message may be left for you?
   - Have you included the requested total funding amount from the budget form?

2. Budget Information for Non-Construction Programs (SF-424A)
   - Are budget items complete?
   - Is the summary budget included?
   - Is the funding level total in line k within the stated limit of $300,000 for the full duration of the project proposal?
   - Is the budget duration within the stated limit of 3 years?

3. Proposal and All Attachments in PDF
   - Is the project title listed at the top?
   - Has the Project Summary been included?
   - Does the summary include research objectives?
   - Is the summary no more than 250 words?
   - Do the name and institution of the Principal Investigator, co-investigators, and subcontractors appear on the page?
   - Does the page include the total amount requested?
   - Does the page include the start and end date?

4. Table of Contents
   - Are page numbers included for each item?

5. Project Description
   - Is the project fully described?
   - Does this section adhere to the format and page limitations, as specified on page 15?
   - Does this section begin as page 1, as specified?
   - Does the project description contain a tentative schedule or workplan of major steps of study, including a staffing plan?
   - Is a budget narrative included?

6. Citations to Project Description
   - Are all references cited?
   - Are all citations referenced?
   - Do all citations contain a title and are they in accepted journal format?

7. Documentation from Collaborator(s), or Host Institution (where appropriate)

8. Vitae and Publications List(s)
   - Are vitae included for the Principal Investigator and co-investigators, senior associates, and other key project personnel (including subcontractors—see instructions)?
   - Are the vitae current and pertinent?
   - Are the publications lists complete and limited to the last 5 years?

9. Indirect Cost Rate Schedule
   - For reimbursement of indirect costs, is a copy included of the applicant’s indirect cost rate schedule that reports the applicant’s federally negotiated audited rate?

10. General
    - Does the proposal conform to all format and page limitations and deadline requirements?

Applications are invited for competitive grant and cooperative agreement awards from the U.S. Department of Agriculture (USDA) for fiscal 2011. This document provides background on the research areas of interest to the Food Assistance and Nutrition Research Program (FANRP), application procedures, deadlines for submission, and guidance for the application process.

USDA’s Economic Research Service (ERS) anticipates awarding approximately $1.5 million in fiscal 2011 for competitive grants and cooperative agreements. ERS will accept proposals under this program for funding levels, inclusive of indirect cost when applicable, between $100,000 and $300,000 (for the duration of the grant and/or the cooperative agreement, not to exceed 3 years). (Parties interested in smaller grants may want to consider ERS’s RIDGE Program. See the FANRP website at http://www.ers.usda.gov/briefing/foodnutritionassistance/Funding/RIDGE.htm for more information.)

Applications for this program must be submitted electronically through the Grants.gov website at www.grants.gov. The Grants.gov website is the single access point to electronically find and apply for competitive Federal funding opportunities and manage grants from all Federal grantmaking agencies in one place.

First-time users of Grants.gov should go to the “Apply for Grants” tab on the website and carefully read and follow the steps listed in order to apply. Your organization will need to be registered with the Central Contractor Registry (CCR) at www.ccr.gov. Your organization also will need a Data Universal Number System (DUNS) number. A DUNS number is a unique nine-character identification number provided by the commercial company, Dun & Bradstreet (D&B). To investigate if your organization already has a DUNS number or to obtain a DUNS number, contact Dun & Bradstreet at 1-866-705-5711. Be sure to complete the Marketing Partner ID (MPIN) and Electronic Business Primary Point of Contact fields during the CCR registration process. These are mandatory fields that are required when submitting grant applications through www.grants.gov.

Authority

The Authority for this program is contained in 7 U.S.C. 292, 411, 427, 1441a, 1621-1627, 1704, 1761-68, 2201, 2202, 3103, 3291, 3311, 3504; 22 U.S.C. 3101; 42 U.S.C. 1891-93; 44 U.S.C. 3501-11; 50 U.S.C. 2061 et seq, 2251 et seq. Under this program, subject to the availability of funds, the Secretary may award competitive grants and cooperative agreements for the support of research projects to further USDA food and nutrition assistance programs, especially the Supplemental Nutrition Assistance Program (SNAP)—formerly the Food Stamp Program—Child Nutrition Programs (School Breakfast, National School Lunch, Summer Food Service, and Child and Adult Care Food Programs), and the Special Supplemental Nutrition Program for Women, Infants, and Children (WIC). Proposals may be submitted by any State agricultural experiment station, college, university, other research institution or organization, Federal agency, private organization, corporation, or individual.
Applicable Federal Statutes, Regulations, and Guidelines

Applicable Federal statutes, regulations, and guidelines include the following: (a) guidelines to be followed when submitting grant proposals and cooperative agreements and rules governing the evaluation of proposals; (b) the USDA Uniform Administrative Requirements for Grants and Agreements with Institutions of Higher Education, Hospitals, and Other Non-Profit Organizations, 7 CFR Part 3019; (c) the USDA Uniform Federal Assistance Regulations, 7 CFR Part 3015; (d) the USDA Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments, 7 CFR Part 3016; and (e) Cooperative Research Agreement 7 USC 3318b.

The Catalog of Federal Domestic Assistance (CFDA) number for this program is 10.253. The CFDA Title is Food Assistance and Nutrition Research Program.
ERS is accepting proposals for economic research that focuses on USDA’s domestic food assistance and nutrition programs. All proposals should have important implications for these programs. Anticipated funding in fiscal 2011 for competitive grants and cooperative agreements is approximately $1.5 million, of which up to $500,000 is available specifically for projects described in Section III on page 6.

Funds are to support research and evaluation activities. Proposals should not request funding for the development of new education or outreach materials, or to provide direct benefits to households or individuals.

USDA administers 15 food and nutrition assistance programs that provide children and low-income people access to food, a healthful diet, and nutrition education. At some point during the year, about one in four Americans participates in at least one of these programs that include the Supplemental Nutrition Assistance Program (SNAP)—formerly the Food Stamp Program—WIC, the National School Lunch Program, the School Breakfast Program, and the Child and Adult Care Food Program. Information on these programs can be found at USDA’s Food and Nutrition Service (the agency responsible for managing the programs) website at http://www.fns.usda.gov/fns/.

Three research areas (listed below) highlight priorities for proposed competitive grants or cooperative agreements. The suggested topics within each Priority Research area are intended to stimulate research proposals. Applicants may propose other policy-relevant topics with justification.

ERS encourages proposals that take advantage of natural experiments or that use existing nationally representative cross-sectional or longitudinal data, or survey data enhanced with other extant data. For a description of nationally representative surveys useful to food and nutrition assistance studies, see table 1 on page 7 or go to www.ers.usda.gov/briefing/foodnutritionassistance/data/. Use of other datasets is also acceptable, with justification. Proposals using data that are not publicly available must demonstrate access to the data. Proposals addressing areas described in Section III on page 6 may be expected to collect new data on a relatively small scale.

FANRP has a large inventory of previously funded research projects. To avoid duplication, applicants are encouraged to read project descriptions in the FANRP database, available at www.ers.usda.gov/Briefing/FoodNutritionAssistance/Projects.

The three priority research areas for this year’s competitive grants or cooperative agreement proposals are:

I. Food Assistance and the Macroeconomy,

II. Food Assistance and Food Choices, and

III. Using Behavioral Economics and Incentives To Promote Child Nutrition.
I. Food Assistance and the Macroeconomy

Food assistance programs serve as an economic safety net—buffering the effects of low income and lack of assets and protecting the target populations against income losses and unexpected expenses. Judging from the dramatic rise in SNAP caseloads, the programs’ role as a safety net has certainly expanded and may have changed during and after the recent deep recession. Examples of research questions of interest include:

- How do economic shocks, such as unemployment, the mortgage crisis, divorce or separation, or disability, affect the number of eligibles and participants in USDA’s food and nutrition assistance programs? How do these shocks affect the magnitude and allocation of household spending on food and nonfood budget items, such as energy, housing, clothing, and medical services?

- How have changes in economic and other factors affected the characteristics of new program participants during and after the recent recession, especially as it pertains to their past and present employment and asset levels?

- To what extent do low-income households use multiple public and/or private food and nonfood assistance programs, and has this relationship changed with the recent recession? What factors influence these participation decisions, and how do the programs work individually and additively to create a safety net?

- What have been the effects of the recession on alternative measures of poverty? How do such measures relate to food assistance programs?

- How do economic factors influence the tradeoffs that families make between food at home, food away from home, and/or nonfood spending (such as housing, utilities, child care, medical care), how do they influence food spending and food choices, and how do they differ across population groups, geographic locations, and seasons?

II. Food Assistance and Food Choices

Food choices depend on food and nutrition assistance program benefits, household income, consumer preferences, as well as prices and other market factors. ERS is interested in research on how food assistance programs influence food choices for low-income households. Examples of questions of interest to ERS include:

- How can behavioral economic concepts be applied to food assistance program design and delivery to increase program effectiveness, and what are the potential costs and benefits of such program changes? Can understanding of these factors be improved by field experiments or by studying effects of natural experiments? For example, how do WIC voucher redemption patterns differ when program benefits are distributed via Electronic Benefit Transfer (EBT) versus paper instruments?

- How do school meal reimbursement systems for free, reduced-price, and paid lunches and school meal pricing decisions affect student participation, meal quality, provision of competitive foods, and cross-subsidization?
• What are the determinants of CACFP participation for centers, family day care-sponsoring organizations and homes, and families? What are the effects of attending a CACFP-participating center or family day care home on children's diet quality, eating habits, weight status, and other measures of well-being?

• What are the impacts of understudied programs—such as Summer Food Service and After-School Snacks and Suppers—on food access, diet quality, food security, and food spending? Do they affect other aspects of children’s well-being—for example, do these programs increase the likelihood that children are physically active?

• What are the impacts of recent revisions to WIC food packages on market factors (such as the number, type, and location of WIC-authorized vendors and the availability, variety, quality, and prices of foods), voucher redemption patterns, food expenditures, food choices, and nutrient intakes?

III. Using Behavioral Economics and Incentives To Promote Child Nutrition

In a collaborative effort with USDA’s Food and Nutrition Service, ERS seeks to extend behavioral economics research to test interventions in child nutrition program settings (schools and child care centers) or through “natural experiments,” such as from school foodservice systems using computerized point-of-sale systems to record participation and meal selections under alternative policies and practices. Our primary interest is in demonstrating and assessing to what extent the application of behavioral economic theories can be used to develop and test interventions that affect food choices and consumption, as well as program participation, cost, and other program parameters. Some examples of potential strategies that could be demonstrated are listed below. However, because ERS is interested in identifying creative and innovative school environment strategies, applicants should not feel constrained to the listed strategies:

• Allowing students (or their parents) to pre-select foods before entering the foodservice line to avoid impulsive selections that may contribute to excess consumption;

• Allowing pre-payment for more nutritious foods, while requiring cash payment for other alternatives;

• Increasing the prominence, visibility, and accessibility of nutritious choices on the cafeteria line, while placing less healthful foods where they are hard to see and reach;

• Improving the dining environment through improved lighting, reduced noise, and sufficient time to eat.

ERS also seeks strategies suggested by behavioral economics that encourage foodservice administrators to implement changes that shape consumer demand toward healthier choices and related changes in food purchasing and meal planning information approaches that improve the program’s ability to meet specific nutritional goals while maintaining student acceptability and preventing waste and undue cost.

Note: For additional descriptions and links go to [www.ers.usda.gov/briefing/foodnutritionassistance/data/](http://www.ers.usda.gov/briefing/foodnutritionassistance/data/)

Acronyms: CACFP (Child and Adult Care Food Program), SNAP (Supplemental Nutrition Assistance Program), NSLP (National School Lunch Program), SBP (School Breakfast Program), WIC (Special Supplemental Nutrition Program for Women, Infants, and Children).

¹ERS has acquired the Nielsen Homescan data for the years 1998-2009. Because the data are owned by Nielsen and are proprietary, use of the data is subject to the terms and the conditions of the contract under which the information was purchased. The contract limits the use of the data to issues of interest to the Department and allows sharing the data with external researchers when, as third-party consultants, the external researchers carry out the work of the Department. USDA-funded research agreements, therefore, can use these data subject to the terms of the contract.
The Food Assistance and Nutrition Research Program (FANRP) may award competitive grants or cooperative agreements under this announcement. **Applicants need not specify the type of award in their proposal. FANRP reserves the right to determine the type of award.** The type of award made for a selected proposal will be governed by the nature and degree of involvement desired by FANRP in the project and the type of institution requesting funding (see “Authority,” page 1). In accordance with Federal statutes, the amount of indirect cost ERS will pay is governed by the type of award and the type of institution receiving the award.

Proposals may be submitted by any State agricultural experiment station; college; university; other research institution or organization; Federal, State, or county agencies; private organization; corporation; or individual. Proposals submitted by non-United States organizations will not be considered.

**Types of Awards**

- **Grants:** Grants will be awarded when the research topic does not require substantial involvement between ERS staff and the recipient during the performance of the award.

- **Cooperative Agreements:** Cooperative agreements will be awarded when the research topic requires more substantial involvement between ERS and the investigator(s). There are two types of cooperative agreements: cooperative research agreements and assistance-type cooperative agreements. In a cooperative research agreement, ERS staff and extramural researchers are close collaborators and contributors to the research; in an assistance-type cooperative agreement, the extramural researchers are responsible for conducting the greater part of the work on the project. Cooperative research agreements require both parties to contribute to the funding of the project; assistance-type cooperative agreements do not have this joint funding requirement.

**Indirect and Other Costs**

Federal statutes dictate the amount of indirect costs that ERS pays by type of award and institution. In cooperative research agreements, ERS pays: no indirect costs to State cooperative institutions (i.e., land-grant universities and their constituent schools and departments); the negotiated indirect cost rate not to exceed 10 percent of total direct costs to nonprofit institutions other than State cooperative institutions; and the negotiated indirect cost rate not to exceed the audited rate of any federally recognized audit agency to other institutions. In competitive grants and assistance-type cooperative agreements, ERS pays the negotiated indirect cost rate not to exceed the audited rate of any federally recognized audit agency to State cooperative institutions and institutions other than State cooperative institutions and nonprofit institutions; and the negotiated indirect cost rate (no statutory limitation) to nonprofit institutions other than State cooperative institutions. For reimbursement of indirect costs, the applicant must include a copy of its indirect cost rate schedule with the application. Tuition shall be treated as an allowable cost, subject to negotiation, where reimbursement of such costs is not prohibited by law.
Peer Review of Applications

All proposals received will be acknowledged. If you do not receive an acknowledgment within 30 days of the submission deadline, please contact the FANRP office at (202) 694-5466 or e-mail: FANRP@ers.usda.gov.

Prior to technical examination, a preliminary review will be made for meeting proposal eligibility requirements. Proposals that do not fall within the guidelines as stated in this document will be eliminated from program competition, and the applicant will be notified in writing.

Peer review panels will be convened to review proposals in each research area. All applicants will be notified in writing by September 30, 2011 as to whether their proposal has been accepted for an award by FANRP. Applications submitted through Grants.gov may be monitored online at the website and will also received a written notice from the program office.

Peer review panel members will be selected based upon their training and experience in relevant research or technical fields, taking into account the following factors:

• The level of formal social science or technical education and other relevant experience of the individual as well as the extent to which an individual is engaged in relevant research and other relevant activities;

• The need to include as peer reviewers experts from various areas of specialization within relevant social science or technical fields;

• The need to include as peer reviewers experts from a variety of organizational types (for example, universities, government, industry, private consultant(s)) and geographic locations; and

• The need to include as peer reviewers individuals with relevant program knowledge and experience.

During the peer evaluation process, care will be taken to prevent any actual or potential conflicts of interest that may have an impact on review or evaluation. Proposal content and peer evaluations will be kept confidential.
Evaluation Factors and Criteria

The proposal evaluation process includes peer review panels consisting of experts from academia, government, and the private sector. In addition to reviewers’ comments, FANRP’s selection process considers coverage of priority research areas, overlap among proposals and ongoing projects, program needs, potential benefits resulting from research collaborations on particular projects, proposed research products, and the availability of funding.

The peer review panel will use the following criteria and weights to evaluate proposals (100 points total):

**Research Merit of the Proposal (weight: 35 points)**

This criterion is used to assess the conceptual adequacy of the hypothesis or research question, the clarity and delineation of objectives, the adequacy of the description of the undertaking, how the anticipated results will advance policy knowledge and the development and implementation of programs, and the suitability of the proposed research products for ERS publication. Background information should be brief for proposals that address one of the topics described on pages 3-6; a more extensive justification is needed for a proposal with a nonlisted topic.

**Overall Approach (weight: 30 points)**

This criterion relates to the probability of success of project; time allocated for systematic attainment of objectives; analytic approach; and research design, appropriateness of data, and suitability and feasibility of methodology.

**Workplan, Budget, and Cost-Effectiveness (weight: 20 points)**

This criterion relates to the extent to which the total budget adequately supports the project and is cost effective. The proposal should provide an explanation and justification for any large or unusual expenditures. Reviewers will evaluate if the workplan is reasonable and sufficient to ensure timely implementation and completion of the study. The workplan should also provide evidence of the adequacy of available or attainable support personnel, facilities, and instrumentation. When achievement of the workplan requires collaboration, evidence is needed of the adequacy of support from and commitment to cooperation from any collaborative organization.

**Key Personnel (weight: 15 points)**

This criterion relates to the adequacy of the number and qualifications of the key persons who will carry out the project. It also relates to their time committed to this project and to their availability.
How To Obtain Application Materials

FANRP is using the Internet for primary distribution of information and application materials for its Competitive Grants and Cooperative Agreements Program. Applications must be submitted electronically through www.grants.gov. Applicants may submit paper-copy applications under extenuating circumstances, such as outages of the Grants.gov website that can be substantiated by a valid case number with the Grants.gov support center. If you have questions, contact:

David Smallwood  
ERS/Food Economics Division  
1800 M Street, NW, Room N2130  
Washington, DC 20036-5831  
Telephone: (202) 694-5466  
Fax: (202) 694-5677  
E-mail: FANRP@ers.usda.gov
Application Process

Overview

These guidelines are provided to assist you in preparing a proposal to the Competitive Grants and Cooperative Agreements Program of the Food Assistance and Nutrition Research Program. Please read these guidelines carefully before preparing your submission.

A checklist is provided at the beginning of this document to help you provide the necessary information for completing a proposal. An Application for Federal Domestic Assistance Form (SF-424) and a budget form (SF-424A) are required for the proposal. These forms (from the Short Organizational family of forms) are included in the application package, downloadable from www.grants.gov.

Submission Requirements

The purpose of a grant or cooperative agreement proposal is to persuade FANRP and members of the food assistance and nutrition research community who provide advice to FANRP that the proposed project is important, methodologically sound, and worthy of support under the criteria listed on page 10. The application should be self-contained, should clearly present the merits of the proposed project, and should be written with care and thoroughness. It is important that all essential information for comprehensive evaluation be included. Omissions often result in processing delays and may jeopardize funding opportunities.

In preparing the proposal, applicants are urged to ensure that the name of the Principal Investigator and, where applicable, the name of the submitting institution are included on the Application for Federal Domestic Assistance Form (SF-424).

Format and Contents of Proposals

For electronic submissions through Grants.gov, the proposal and all attachments must be submitted in portable document format (pdf). Using pdf allows applicants to preserve the formatting of their documents. In order to save a document as a pdf, the applicant will need to use pdf generator software. Grants.gov has published the following web page on tools and software that the applicant can use: www.grants.gov/applicants/resources.jsp

Application for Federal Domestic Assistance-Short Organizational (SF-424)

The submission through Grants.gov must contain an Application for Federal Domestic Assistance-Short Organizational (SF-424), including authorized electronic signatures from your organization.

Budget Information for Non-Construction Programs (SF-424A)

A summary budget is required detailing requested support for the overall project period, which is not to exceed 3 years. Funding levels accepted are between $100,000 and $300,000, inclusive of indirect cost where applicable, for the duration of the project (not to exceed 3 years).

Funds may be requested under any of the budget categories listed, provided that the item or service requested is identified as necessary for successful conduct of the proposed project, allowable under applicable Federal cost principles, and not prohibited under any applicable Federal statute or regulation.

Budget items include:
- Personnel
- Fringe benefits
- Travel
- Equipment
- Supplies
- Contractual
- Other direct costs
- Indirect charges
Salaries of faculty members and other personnel who will be working on the project may be requested in proportion to the effort they will devote to the project.

Electronic copies of the standard budget form and general instructions are available at [www.grants.gov](http://www.grants.gov) as part of the application package. Specific instructions for completing the proposal budget form are found below.

### Project Summary Page

The proposal must start with a Project Summary Page that includes:

- Project title;
- The names and institutions of the Principal Investigator, co-investigators, and subcontractors;
- The total amount of funding requested;
- The project start and end dates; and
- A Project Summary of 250 words.

The summary is not intended for the general reader; consequently, it may contain technical language comprehensible by persons in disciplines relating to the food and agricultural sciences. The project summary should be a self-contained, specific description of the activity to be undertaken and should focus on overall project goal(s), supporting objectives, and plans to accomplish project goal(s).
The importance of a concise, informative project summary cannot be overemphasized. The Project Summary Page should not include a page number.

**Table of Contents**

A Table of Contents, itself unpaginated, should be placed immediately after the Project Summary Page. This table should direct the reader to the pages for all sections of the proposal, beginning with the Project Description on page 1.

**Project Description**

The description may not exceed 15 pages (whether single- or double-spaced) of written text and may not exceed a total of 20 pages, including figures, tables and references. The proposal should be assembled so that the Project Description immediately follows the Project Summary and Table of Contents. To clarify page limitation requirements, page numbering for the Project Description should start with 1, and should be placed on the bottom of the page. Do not include attachments, such as survey instruments and journal articles. All proposals are to be formatted for standard 8½” x 11” paper. In addition, margins must be at least 1 inch, type size must be 12 point (equivalent to this size for some printers is 10 pitch or 10 characters per inch, which is also acceptable), there should be no more than six (6) lines per inch. The project description must contain the following components:

- **Introduction.** A clear statement of the long-term goal(s) and supporting objectives or research questions of the proposed project should be included. The most significant published work in the field under consideration, including the work of key project personnel on the current application, should be reviewed. The current status of research in this field should also be described.

- **Rationale and Significance.** Concisely present the rationale behind the proposed research. The objectives’ specific relationship to the potential long-term improvement in the efficiency of USDA’s food assistance and nutrition programs should be shown clearly. These purposes are described under Priority Research Areas beginning on page 3. Any novel ideas or contributions that the proposed project offers should also be discussed in this section.

- **Research Methods.** The hypotheses or questions being asked and the methodology being applied to the proposed project should be stated explicitly. This section must include:
  - A description of the proposed research in the sequence in which it is to be performed;
  - Techniques to be used in carrying out the proposed project, including the feasibility of the techniques;
  - Explanation of data collection methods, including interviewer training, sample design and selection, and measures for obtaining adequate response rates (for proposed projects that plan to collect survey data);
  - Results expected;
  - Means by which data will be analyzed or interpreted;
  - Discussion of relevant variables and of model specification issues (for proposed projects that plan to use multivariate analysis);
• Possible application of results;
• Pitfalls that may be encountered;
• Limitations to proposed procedures;
• A tentative schedule or workplan for conducting major steps of study, including a staffing plan;
• A budget narrative; and
• Identification of research reports and outlets.

The workplan should include sufficient detail so that reviewers can ascertain the roles and level of involvement of assigned staff. The workplan should also include a budget narrative that briefly describes how the requested funds will be spent, including specifics on travel, equipment, and personnel. Funded projects should anticipate two briefings at ERS headquarters: one at the start of the project and one at the completion. Travel costs for these briefings should be included in the project budget.

Proposed Research Products

All applications must propose at least one of three types of publications as an anticipated output:

• **ERS Report.** These are official ERS Departmental reports, include an ERS co-author, and are cleared by USDA’s Office of Communications.

• **Contractor and Cooperator Report (CCR).** These reports, authored solely by non-ERS staff, will be posted at the National Agricultural Library. Unlike ERS reports, it is the responsibility of the awardee’s institution to conduct the review of the report. The review shall include the ERS project manager. All Contractor and Cooperator Reports are required to contain the following disclaimer:

  Disclaimer: This study was conducted by [Institution] under a cooperative research contract with USDA’s Economic Research Service (ERS) Food and Nutrition Assistance Research Program (FANRP): contract number XXX (ERS project representative: [Name]). The views expressed are those of the authors and not necessarily those of ERS or USDA.

Applications proposing Contractor and Cooperator Reports should include a brief description of how the [Institution] will conduct the review. The final report will be submitted to ERS, together with the reviewers’ comments provided through the proposed process and a memo describing how the comments were addressed.

• **Journal Article.** Research findings can also be published in appropriate professional journals.

Applications may propose additional products such as other reports and journal articles as well as data products and conference presentations.

*Note: The sections detailed below are not included in the page limitations for the Project Description section.*
**Citations to Project Description**

All references cited should be complete, including titles and all co-authors, and should conform to an accepted journal format.

**Collaborative Arrangements**

If the nature of the proposed project requires collaboration or subcontractual arrangements with other research scientists, corporations, organizations, agencies, or entities, the applicant must identify the collaborator(s) and provide a full explanation of the nature of the collaboration. Evidence (that is, letters of intent) should be provided to assure peer reviewers that the collaborators involved have agreed to render this service.

When a project requests funds for multiple institutions, a lead institution must be designated. Only one proposal may be submitted for the project and only from the lead institution. Other institutions may be designated as subcontractors. Proposals with Application for Funding Cover Pages from more than one institution are not permitted and will be returned without review. Identical proposals submitted by different investigators from different institutions are also not permitted and will be returned without review.

**Vitae and Publications List(s)**

To assist peer reviewers in assessing the competence and experience of the proposed project staff, all personnel who will be involved in the proposed project must be identified clearly. For the Principal Investigator and each co-investigator listed on the Application for Funding Cover Page, for all collaborators and other senior personnel who expect to work on the project in a significant fashion (for instance, expectation of co-authorships on ensuing publications) whether or not funds are sought for their support, and for all subcontractors, the following should be included:

- **Curriculum Vitae (CV).** The curriculum vitae should be limited to a presentation of academic and research credentials, such as educational, employment, and professional history, honors, and awards. The vitae shall be no more than two pages each in length, excluding publications listings; and

- **Publications List(s).** A chronological list of all publications in refereed journals during the past 5 years, including those in press, must be provided for each professional project member for whom a curriculum vitae is provided. Also list only those non-refereed technical publications relevant to the proposed project. All authors should be listed in the same order as they appear on each paper cited, along with the title and complete references as these usually appear in journals.

**Indirect Cost Rate Schedule**

For reimbursement of indirect costs, the applicant must include with the application a copy of its indirect cost rate schedule that reports the applicant’s federally negotiated audited rate.
**Current and Pending Support**

The information in this section of the proposal provides reviewers with an opportunity to evaluate the contribution the proposed work will make to the investigators’ overall research program.

The proposal must list any other current public or private research support (including in-house support) to the Principal Investigator or co-investigators, whether or not salary support for the person(s) involved is included in the budget. FANRP must be informed of changes in pending grant support that arise after the proposal has been submitted. Nonflexible funds—including Principal Investigator and support staff salaries, office space, and other indirect costs—may be excluded when these funds are received through a noncompetitive process. Analogous information must be provided for any pending proposals, including this proposal, that are now being considered by, or that will be submitted in the near future to, other possible sponsors, including other USDA programs or agencies. Note that this proposal must be listed as Pending. In addition to completing the information, Investigators also should include a brief statement of research objectives or project summaries for all projects listed in Current and Pending Support. Concurrent submission of identical or similar proposals to other possible sponsors will not prejudice proposal review or evaluation by the Program Manager or experts engaged by the Program Manager for this purpose. However, a proposal that duplicates or overlaps substantially with a proposal already reviewed and funded (or that will be funded) by FANRP will not be funded under this program.

Please include the following information under the heading “Current and Pending Support”:

- Record information for active and pending projects in separate sections by name, supporting agency, total funding amount, effective and expiration dates, percentage of time committed, and title of project.

- All current research to which the Principal Investigator, co-investigators, and other senior personnel have committed a portion of their time must be listed, whether or not salary for the person involved is included in the budgets of the various projects.

**Additions to Project Description**

Each project description is expected to be complete without the need to refer to additional materials. However, additions to the Project Description (appendices) are allowed if they are directly germane to the proposed research. These may include reprints (papers that have been published in peer-reviewed journals) or preprints (manuscripts in press for a peer-reviewed journal must be accompanied by letter of acceptance from the publishing journal).

Information may not be appended to a proposal to circumvent page limitations prescribed for the project description. Extraneous materials will not be used during the review process.
What/When/Where To Submit

Applications must be submitted electronically through www.grants.gov. Applicants may submit paper-copy applications under extenuating circumstances, such as outages of the Grants.gov website that can be substantiated by a valid case number with the Grants.gov support center.

Every effort should be made to ensure that the proposal contains all pertinent information when originally submitted. Prior to submitting, it is urged that the application be compared with the checklist on the inside front cover of this announcement.

Late proposals will not be considered unless extenuating circumstances are documented with Grants.gov.

Reminder: Applications must be submitted by April 4, 2011
FANRP reserves the right to negotiate with the Principal Investigator or project director and/or with the submitting organization or institution regarding project revisions (for example, reductions in the scope of work), funding level, or period or method of support prior to recommending any project for funding.

A proposal may be withdrawn by the Principal Investigator at any time before a final funding decision is made regarding the proposal; however, withdrawn proposals normally will not be returned. One copy of each proposal that is not selected for funding (including those that are withdrawn) will be retained by FANRP for a period of one (1) year. The remaining copies will be destroyed.

**Duration of Awards**

The total period for which a grant or cooperative agreement is awarded may not exceed 3 years.

**Management Information**

Once a grant or cooperative agreement has been reviewed and recommended for funding, specific management and organizational information relating to the applicant shall be requested on a one-time basis prior to the award. Copies of forms needed in fulfilling the requirements will be provided by the FANRP office.

**Notice of Award**

A competitive grant or cooperative agreement award document, containing the budget, terms and conditions of the award, and other necessary information, will be prepared and forwarded to each grantee or cooperator, along with a Notice of Competitive Grant or Cooperative Agreement Award, by the Administrative and Financial Management, ARS, USDA.

All projects selected for award will be listed on the ERS website at [www.ers.usda.gov/Briefing/FoodNutritionAssistance/Compgrants.htm](http://www.ers.usda.gov/Briefing/FoodNutritionAssistance/Compgrants.htm).

**Financial Obligations**

For any competitive grant or cooperative agreement awarded, the maximum financial obligation of ERS shall be the amount of funds authorized for the award. This amount will be stated on the award instrument and on the approved budget. However, in the event an erroneous amount is stated on the grant award instrument, the approved budget, or any supporting document, ERS reserves the unilateral right to make the correction and to make an appropriate adjustment in the amount of the award to align with the authorized amount.

Nothing in these guidelines or any program announcement shall obligate ERS, the Department, or the United States to take favorable action on any application received in response to any announcement, or to support any project at a particular level. Further, neither the approval of any application nor the award of any project grant or cooperative agreement shall commit or obligate the United States in any way to make any renewal, supplemental, continuation, or other award with respect to any approved application or portion of an approved application.

Awardees will be required to ensure that all funds are expended in accordance with the terms and conditions of grant or cooperative agreement award,
Departmental regulations, and the applicable Federal cost principles in effect on the date of the award. Responsibility for the use and expenditure of grant or cooperative agreement funds may not be transferred or delegated in whole or in part to another party (even if a grantee or cooperator enters into a contractual relationship with that party), unless the grant or cooperative agreement itself is transferred in whole or in part to another party by ERS.

Authorization to make changes in approved project plans, budget, period of support, etc., will be governed largely by the terms and conditions of the competitive grant award or cooperative agreement. Among other things, these terms and conditions will set forth the kinds of post-award changes that may be made by the awardee and the kinds of changes that are reserved to the FANRP Office. It is urged that all key project personnel and authorized organizational representatives read them carefully.

Final payment will not be made until all deliverables are received.

Release of Information

ERS receives grant and cooperative agreement proposals in confidence and will protect the confidentiality of their contents to the extent permitted by law. When a proposal results in a grant or cooperative agreement, however, it becomes part of the public record and is available to the public upon written request. Copies of proposals (including excerpts from proposals) that are not funded will not be released. Information regarding funded projects will be made available to the extent permitted under the Freedom of Information Act, the Privacy Act, and implementing USDA regulations.

Requests to obtain authorized information (and fee schedule relating to the handling of this information) or to obtain information regarding procedures related to release of grantor cooperative agreement information should be directed to the Freedom of Information Act (FOIA) Coordinator, ARS Information Staff, 5601 Sunnyside Ave., Bldg. 1, Rm. 2248, Mail Stop 5128, Beltsville, MD 20705-5128; telephone (301) 504-1640.
