The Consequences of Welfare Reform and Economic Change for the Food Stamp Program—Illustrations from Microsimulation

Final Report

Prepared by Jonathan Jacobson, Nuria Rodriguez-Planas, Loren Puffer, Emily Pas, and Laura Taylor-Kale of Mathematica Policy Research, Inc.

ERS contact: Kenneth Hanson

Abstract

This report summarizes the results of a longitudinal microsimulation model known as MATH STEWARD (Micro Analysis of Transfers to Households/Simulation of Trends in Employment, Welfare, and Related Dynamics). The simulation was used to explore how state welfare reform and economic changes between 1992 and 1998 might have affected the Food Stamp Program (FSP) and how an economic recession might affect food stamp outcomes. Slightly over half of the reductions in FSP caseloads and costs between December 1992 and December 1998 were simulated. About one-third of the simulated reductions in caseloads and costs could be attributed to changes in state welfare and child care policies; about two-thirds could be attributed to changes in state unemployment rates. In a future recession similar to the 1990-92 recession, food stamp caseloads could increase about 11 percent and food stamp costs could increase about 13 percent.

This report was prepared by Mathematica Policy Research, Inc., under a cooperative assistance agreement from the Economic Research Service. The views expressed are those of Mathematica and not necessarily those of ERS or USDA.

CONTENTS

Chapter		Page
	INTRODUCTION.....	ix
I	BACKGROUND.....	1
	A. CHANGES IN UNEMPLOYMENT RATES AND WELFARE/FSP CASELOADS.....	1
	B. CHANGES IN WELFARE, CHILD CARE, AND FOOD STAMP POLICIES.....	3
	1. Changes in Welfare Policy.....	3
	2. Changes in Child Care Policy.....	5
	3. Changes in Food Stamp Policy.....	5
	C. EFFORTS IN THE LITERATURE TO EXPLAIN CASELOAD DECLINES.....	6
	1. Explaining Declines in Welfare Participation.....	6
	2. Explaining Declines in Food Stamp Participation.....	8
II	INTRODUCTION TO THE MATH STEWARD MODEL.....	11
	A. JUSTIFICATION FOR USING MICROSIMULATION.....	11
	B. MODEL DATABASE.....	12
	C. BEHAVIORAL EQUATIONS.....	13
	D. SIMULATION SOFTWARE.....	14
	E. USING THE MODEL TO SIMULATE THE CONSEQUENCES OF ECONOMIC CHANGE FOR THE FSP.....	15
III	SIMULATED CONSEQUENCES OF WELFARE REFORM FOR FOOD STAMP OUTCOMES.....	19
	A. DESCRIPTION OF OUTCOMES.....	19
	B. ANTICIPATED EFFECTS.....	20
